Cognitive ToyBox for Schools is published by Cognitive ToyBox, Inc	Approved by Bureau of Early Learning Services for		
		Approved for PA pre-kindergarten outcomes reporting	
Description Cognitive ToyBox offers the only hybrid observation and game-based assessment platform in the market for children birth to eight years of age. The platform is based on cutting edge research demonstrating the efficacy of game-based assessments in early childhood. Children play developmentally appropriate games for just five minutes per week, and teachers have access to frequent, timely information on each individual child's learning trajectory. With Cognitive ToyBox, teachers save three hours per week on assessment and spend more time focusing on next steps to support their students for school. Cognitive ToyBox for Schools is reliable and valid, easy to use, and is a Pennsylvania approved vendor for comprehensive coverage of Pre-K outcomes reporting. The assessment platform spans the five developmental domains: Approaches to Learning, Social and Emotional Development, Language and Literacy, Cognition, and Perceptual, Motor and Physical Development, and it is aligned to the eight key learning areas within the PA standards. Critically, the automatically generated reports provide tactical information to facilitate instructional scaffolding and individualized student support. Most importantly, CTB empowers early childhood teachers to focus on what matters most: high quality interactions between students and teachers.			
What ages does the tool assess? Cognitive ToyBox for Schools supports children birth to eight years of age in any early childhood education setting, including Early Head Start, Head Start, Pre-K, and K-2 programs. It is an approved tool to be considered by all Pennsylvania state-funded programs.			
How often are children assessed? Teachers use the observation and game-based assessment tools on a weekly basis. Children play the game-based assessments for just five minutes per week. Teachers review the automatically generated reports in real-time and follow data-informed recommendations to adjust instruction and provide individualized support.			
What on-line tools are available? Cognitive ToyBox for Schools is available on iOS and Android. There is also a computer-based web portal for easy exporting and printing of reports.		What training options are available? Cognitive ToyBox offers both webinars and in-person training for administrators, coaches and teachers.
